In the near future, set in the north-west region of Central America and spanning both Colombia and Venezuela, Delta Force: Angel Falls presents the rural, sparsely populated areas of this exotic locale. The South American environment provides a premise which is naturally beautiful and full of new millennium conflicts.

Marginal governments, involved in local expansionism, continually scuffle with one another and with major global powers. Complicating matters, drug cartels have evolved beyond money to political forces rivaling established governments. Influenced by current events, the game is both topical and novel.

The sometimes local philosophy of "your enemy is my friend and your friend is my enemy" gives rise to a multitude of ever-changing alliances and conflicts which drive the game's rapid action. The culmination of the conflict takes place in the Angel Falls area of Venezuela providing both a spectacular setting and a surprise ending.

Cheers
